

### Grippers | Sprue grippers

Series 840 – power grippers with stroke, clamping diameter 30 mm

### Series 840 – power grippers with stroke, clamping diameter 30 mm

#### **Product notes**

- > Grippers with high gripping force and narrow closing gap for flat sprues
- > Feed stroke (cylinder 1) moves gripper towards the mold for part removal
- > Back stroke (cylinder 2) fully retracts gripper to enable undisturbed part release, e.g. on a conveyor belt
- > Grippers are self-centering
- > Medium: filtered and oiled/unoiled air
- > Suitable for heavy-duty applications due to closed, coaxial cylinder guiding
- > Part control via large area sensor activation, regardless of sprue position (GR04.140B, GR04.140B/NPN)
- > Detection of stroke via optional cylinder sensors
- > Easy exchange of jaws without snap-rings
- > If required, the grippers can quickly be changed over to non-self-centering
- > Included in scope of delivery of GR04.840B: sensor GR04.131-S1, resp. GR04.131-S2, cable 0.2 m, 3-pin M8 male connector, free end; extension cable 2 m, 3-pin M8 male connector, free end
- > Please refer to "suitable sensors" for cylinder sensors
